EDUCATION

Macaulay Honors College at The College of Staten Island (CUNY)

New York, NY

Bachelor of Computer Science, GPA: 3.99/4.0

May 2024

Relevant Coursework: C++ Programming, Data Structures, Object Oriented Programming, Networking & Security, Intro to Database Systems, Operating Systems I, Modern Web Development, Software Engineering, Analysis of Algorithms

TECHNICAL SKILLS

Programming Languages: JavaScript, Java, C++, HTML, CSS, React.js, Python, Swift, MySQL, PostgreSQL, Express.js, Node.js

Technologies: Git/GitHub, Visual Studio Code, PyCharm, Xcode, Eclipse, Postman, Firebase, Docker, AWS, Roboflow, Supervision, Jira

Certifications: CodePath Intro to Mobile Development, LinkedIn Learning Git Essential Training: The Basics

PROFESSIONAL EXPERIENCE

Pixida

New York, NY

Software Engineer Intern | Python, Supervision, OpenCV, Roboflow, React, Tailwind CSS, AWS

June 2024 - August 2024

- Developed a YOLOv8-based object detection system for Prince George County, MD, to enhance pedestrian safety, involving data preprocessing, annotation, and training a custom model to detect pedestrians and vehicles in real-time RTSP video feeds, including near-miss calculations within designated zones
- Engineered data processing workflows with Pandas and AWS S3 to capture and store object detections and near-collision events with detailed metadata (class ID, confidence level, coordinates), and visualized traffic volume in designated zones
- Designed and implemented an interactive kiosk application for National Harbor and Prince George County, MD, with a population of 947,000 residents, using React, Tailwind CSS, and Google Maps API to facilitate route planning across multiple transportation modes (walking, transit, driving) with real-time distance and duration data
- Created a detailed prototype and design in Figma, and actively participated in meetings with stakeholders to discuss and refine the application, ensuring alignment with user needs and project goals before development

Tech Incubator at Queen's College

New York, NY

Web/App Developer Intern | HTML, CSS, Javascript, React

February 2023 - May 2023

- Developed solutions to actively contribute to improving application design and UI for a Campus Event App in development for Queen's College and for Paramount Services Group's website
- Grasped a deeper understanding of React while actively working on a personal finance tracking project

LinkedIn

New York, NY

Software Engineer Intern | HTML, CSS, Javascript, Firebase

January 2023

- Designed a click tracking library to gain insight into user behavior and utilized the data to help improve the UX
- Implemented filtering of the click events, permitting them to be tracked in 2 different modes: Selector Mode or All Mode
- Utilized Firebase to store the user's tracked click events to prevent the loss of data when the web page is reloaded

TECHNICAL PROJECTS

Social Bites – Tech Talent Pipeline Residency Program

|

PERN Stack, Tailwind CSS, AWS

June 2023 - August 2023

- Developed a full stack web application in a group of 4 people to connect users with local restaurants in the area to inform them about their events or promotions by utilizing Google Maps API to access the user's location
- Enabled restaurant owners to publish posts detailing upcoming events, special promotions, and offers, while allowing users to write reviews, effectively fostering direct communication and engagement with their local community
- Collaborated closely with the backend development team to ensure seamless functionality of the application, verifying the accuracy of API endpoints, and validating the proper fetching and posting of data

LEADERSHIP/PROFESSIONAL DEVELOPMENT

Bloomberg

New York, NY

Tech Lab Fellow

April 2024

- One of 30 students selected to collaborate with Bloomberg engineers in a small group setting to build an application using RabbitMQ and Docker
- Utilized Python to design and implement a robust message queue system using RabbitMQ, enhancing real-time data processing and communication between producer and consumer components

Girls Who Code

New York, NY

Web Development Facilitator

March 2023 - May 2023

- Virtually educated a classroom of 10 students in middle and high school in HTML, CSS, and JavaScript, while instilling a growth mindset through projects and team collaboration
